

B PILOTING PRESSURE

To open the check valve through the action of the pilot piston, the piloting pressure must be equal or superior to the resulting value, ex. To release a check in A:

$$P_p + P_m - P_a$$

$$P_p = P_b = + P_a$$

3.5

Where:

P_p = piloting pressure;

P_b = pressure in B;

P_a = pressure in A;

P_{a1} = pressure in A1;

P_m = check valve opening pressure
(spring) or to open the check in B:

$$P_{b1} + P_m - P_b$$

$$P_p = P_a = + P_b$$

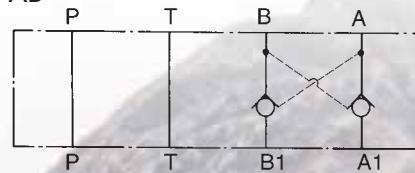

3.5

D DATA AND OPERATING PRESSURE

Recommended max. flow rate	1dm ³ /s (60 l/min)
Max. nominal pressure	32 MPa (320 bar)
Loss of pressure	see F
Pilot area ration piston/check valve	approx. 3,5
Piloting pressure	see B
Dimensions	see C
Mass	about 1 kg

A SIMBOLI FUNZIONALI

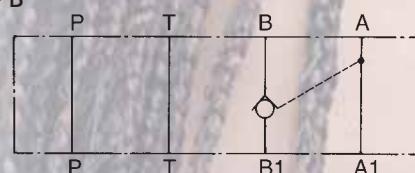

FT3 - CP - AB

FT3 - CP - A

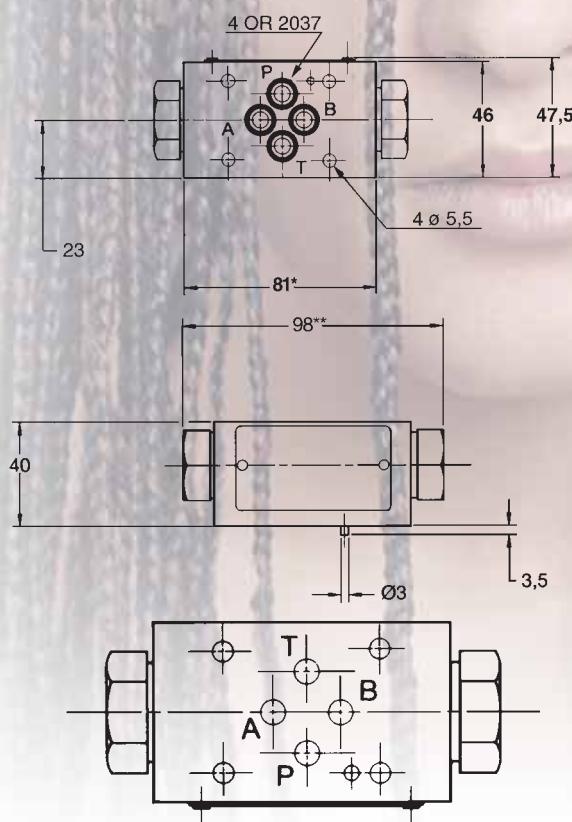

FT3 - CP - B

C DIMENSIONI DI MONTAGGIO

Tutte le quote sono espresse in mm

VALVOLE MODULARI CETOP 03 UNIDIREZIONALI CON PILOTAGGIO IDRAULICO

Nei canali P e T il fluido idraulico passa liberamente; nei canali A e/o B dotati di valvola di controllo, il fluido passa da A → A1 (e/o B → B1) vincendo la molla ⑤ che tiene in chiusura l'otturatore ④ e, in mancanza di pressione di pilotaggio, è bloccato nel senso inverso, da A1 → A (e/o B1 → B); pressurizzando mediante elettrovalvola, per esempio la bocca B, si ha flusso da B → B1 e il pistone di pilotaggio ②, che scorre in posizione centrale, apre l'otturatore ⑤ posto sulla linea A e consente flusso da A1 → A.

TOGNELLA

E HOW TO READ THE MODEL CODE FOR VALVES FT3-CP

FT3 - CP - (AB) - * - ** / 10

1 2 3 4 5 6

1 FT3 stackable valve CETOP 03 - Pressure 32 MPa (320 bar)

2 CO one-way flow control valve, pilot operated (hydraulically)

3 (AB)
A service lines where the control operates; without piloting pressure see also functional symbols
AB Flow blocked from A1 → A and from B1 → B
A Flow blocked from A1 → A, free on B
B Flow blocked from B1 → B, free on A

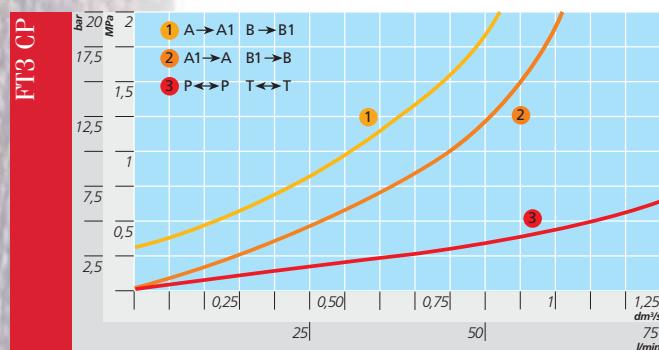

4 Opening pressure (Pm) of the one-way valve, for flow A → A1 and B → B1 without piloting

- (no indication): Pm approx. 0.2 MPa (2 bar)
4 Pm approx. 0.4 MPa (4 bar)

5 Code reserved for special variants (seals, materials, surface treatments, etc.).

6 Design number (progressive) of the valve.

F DIAGRAMMI CARATTERISTICI

Relazioni Δp -Q tipiche per valvole FT3 - CP - AB, in versione standard, rilevate con fluido idraulico avente viscosità di 36 cSt a 50° C.
